In the Claims:

1. (Amended) An animal lure for whitetail deer, said lure comprising an operative component consisting of:

a) the whitetail deer urine of only two does in estrus

wherein the whitetail deer urine is gathered from a single gathering stall used only by said two does in estrus using a method consisting essentially of the steps of:

limiting the use of a gathering stall to only two whitetailed deer does in estrus:

gathering urine from said urine gathering stall; and,

limiting each said lure to only urine gatherered from a single said urine gathering stall.

2-3 (Cancelled)

4. (Amended) The lure of claim 1, wherein said urine is taken exclusively from a single stall used only by said two ~~animals~~ whitetailed deer does.

5-14 (Cancelled)

15. (Previously presented) The method of claim 17, wherein said stall is cleaned after a urination cycle of said two does in estrus before use by other animals is permitted.

16. (Previously presented) The method of claim 17, wherein said first and second does in estrus are permitted to be in contact with each other immediately after said urination cycle of said first animal.

17. (Previously presented) A method for making a lure for white tail deer, said method consisting essentially in the steps of:

- a) limiting use of a gathering stall to only two white-tailed does in estrus;
- b) gathering urine from said urine gathering stall; and,
- c) limiting each said lure to only urine gathered from a single said urine gathering stall.

18. (Previously presented) The method of claim 17, wherein the step of gathering urine includes leading a first doe in estrus out of the stall immediately after urination while a second doe in estrus is lead into the stall so that said does in estrus are within sight of each other.

19. (Previously presented) The method of claim 17, wherein before the step of gathering urine, the first doe in estrus is lead out of the stall immediately after urination cycle while a second doe in estrus is lead into the stall so that said does in estrus are within sight of each other.

20. (Amended) An animal lure for white tail deer, said lure comprising an operative component consisting of:

a) the collected isolated whitetail deer urine of only two does in estrus, wherein the whitetail deer urine is collected from a single gathering stall whose use is limited to only to whitetailed does in estrus using a method consisting essentially of the steps of:

limiting use of a gathering stall to only two whitetailed deer does in estrus;

collecting whitetailed deer urine from said urine gathering stall; and,

limiting said lure to only urine gathered from a single said urine gathering stall.

21. (Previously presented) The lure of claim 20, wherein said urine is taken exclusively from a single stall used only by said two does in estrus.
